In our recent Letter, a minor error occurs in the conversion of diagonal matrix elements $\langle 2_1^+ || M(E2) || 2_1^+ \rangle$ to spectroscopic quadrupole moments Q_2 leading to incorrect values for Q_2 in Table 2 of the Letter. The corrected values are given here in Table I. This correction does not affect the conclusions of the Letter.

TABLE I. The obtained results for the energies of the 2_1^+ states, their $E2$ transition strengths to the ground state, the lifetimes, and the spectroscopic quadrupole moments.
